

FandomGobbler. Progression Map

Action plan for Phases 1–3: browser expansion, product stabilization, and core/adaptor refactor.

The strongest path is to make **FandomGobbler.** excellent everywhere before broadening further. That means distributing first, stabilizing second, and modularizing third.

Timeline Overview

Recommended pace: about 4 months total. Fast enough to keep momentum, slow enough to preserve quality.

Phase	Month 1	Month 2	Month 3	Month 4
Phase 1: Cross-Browser Release	Chrome + Edge publish	Firefox + Safari validation		
Phase 2: Stabilize AO3 Product		Real-user feedback pass	Bugfixes, docs, assets, trust	
Phase 3: Core + AO3 Adapter Refactor			Architecture planning	Core/adaptor separation

Phase Breakdown

4–8 weeks

Phase 1: Release Everywhere

- Ship Chrome update at 2.0.0 quality
- Package and publish for Edge

4–6 weeks

Phase 2: Stabilize and Build Trust

- Fix real user bugs from live usage
- Improve backup confidence and

4–8 weeks

Phase 3: Refactor for Growth

- Separate tracker core from AO3-specific code
- Define shared item and storage models

- Adapt and submit for Firefox
- Test Safari feasibility, workflow, and parity

- reminders
- Tighten docs, screenshots, and support copy
 - Add only low-risk, high-value polish

- Isolate AO3 extraction and injection logic
- Prepare for future FanFiction.net/Wattpad adapters

Deliverables by Phase

Phase 1 Deliverables

- Chrome listing updated and approved
- Edge listing live
- Firefox version submitted or live
- Safari feasibility report and shipping plan

Phase 2 Deliverables

- Post-launch bugfix release(s)
- Polished listing copy and screenshots
- Backup/export confidence improvements
- Basic user help/support materials

Phase 3 Deliverables

- Documented tracker core responsibilities
- Documented AO3 adapter responsibilities
- Cleaner theme/storage/render boundaries
- Technical base for Story Tracker expansion

Guiding Rule

- Distribute first
- Stabilize second
- Modularize third
- Only then expand beyond AO3

Suggested long-term sequence after Phase 3: FanFiction.net, Wattpad, Tumblr, then broader reading targets like blogs, Substack, longform articles, news, and research reads.
